

NGO Monitoring and Evaluation Dashboard Toolkit

Setup Guide and Deployment Manual

1. Introduction

The **NGO Monitoring & Evaluation Dashboard Toolkit** is designed to help organizations transform raw program data into actionable insights using **Power BI**, **R**, and **CSV/Excel integration**.

This toolkit includes:

- Power BI Dashboard Template (.pbix)
- Clean datasets (performance_clean.csv, beneficiaries_clean.csv)
- R Script for data cleaning and transformation
- Documentation

2. Toolkit Contents

After downloading, your folder should contain:

```
NGO_ME_Dashboard_Toolkit/
├── Dashboard/
│   └── NGO Monitoring & Evaluation Dashboard.pbix
├── Data/
│   ├── performance_clean.csv
│   └── beneficiaries_clean.csv
├── Scripts/
│   └── data_cleaning_script.R
├── Documentation/
│   ├── NGO Monitoring Setup Guideline.pdf
│   └── NGO Monitoring & Evaluation Dashboard.pdf
```

3. System Requirements

Ensure you have the following installed:

- Power BI Desktop
- R (version 4.0 or above)
- R Packages:
 - tidyverse
 - readr
 - dplyr

4. Step-by-Step Setup

Step 1: Extract the Files

- Download and unzip the toolkit folder
- Save it in a working directory (e.g., Documents/NGO_Dashboard)

Step 2: Open Power BI Dashboard

1. Open **Power BI Desktop**
2. Click **Open File**
3. Select:

NGO Monitoring & Evaluation Dashboard.pbix

Step 3: Reconnect Data Sources

If Power BI shows missing data:

1. Go to:

Transform Data → Data Source Settings

2. Update file paths to:

- performance_clean.csv
- beneficiaries_clean.csv

Step 4: Refresh Data

- Click **Refresh**
- Ensure all visuals load correctly

Step 5: Run R Script

If you want to regenerate or customize data:

1. Open RStudio
2. Load the script:

```
source("data_cleaning_script.R")
```

3. The script will:
 - Clean raw data
 - Generate updated CSV files
4. Replace files in /Data/ folder
5. Return to Power BI → Click Refresh

5. Dashboard Navigation

Overview Dashboard

- High-level KPIs (Targets, Achievements, Trends)

Indicator Performance

- Compare targets vs actuals
- Monitor progress over time

Beneficiary Breakdown

- Disaggregation by gender, age-group, disability

Geographic View

- Visual mapping of program reach

6. Customization Guide

You can easily adapt this toolkit:

Add New Indicators

- Update dataset in CSV
- Refresh Power BI

Connect to ActivityInfo or any other web based database

- Use API integration via R or Power BI
- Replace CSV with live data source

Branding

- Update logo, colors, fonts in Power BI

7. Troubleshooting

Issue	Solution
Data not loading	Check file paths
R script error	Install missing packages
Visuals blank	Click Refresh
Slow performance	Reduce dataset size
